

Transform empty space into new revenue

As a distributor, you probably think more about what goes inside a box than what goes on the outside. That's where we come in. An innovative advertising network, Zadspace turns the unused exterior of your packaging into a handsome revenue opportunity. What used to be wasted space next to the shipping label is now a 4"x6" color ad - or as we call it, a "Zad."

Zadspace's complete turnkey solution requires zero capital investment and comes with full program management, meaning that we handle everything from selling the Zads to maintaining the onsite Zad printing system. All you have to do is have your warehouse staff affix the Zad to the box, which is as easy as applying the shipping label next to it.

How it works:

1. We locate complementary, non-competitive advertisers who'd be a good fit for you.
2. Approved Zads are printed on-demand on our equipment and affixed by warehouse staff.
3. You get paid for unused space on packages that you were already shipping out anyway.
